Through time and space  
Evolution of universe can't be stopped  
Nature patries on some real events through her infinite  
power  
No distinction between god and humans  
They act in the story of evolution  
Hour the wind of destiny carrying my light in the  
corridor of time

Our existence is a point on the line of eternity  
Enter in the deep abyss of time  
NEVERENDING DESTINY

During their life, human being has known how to  
evolute in a special way  
But universe is there and it can be changed simply with  
the acts of one character  
The force which rules our endless world go from each  
part of it  
Time has come for the complete change to become  
true  
We're in a new benod, it's our fate  
Neverending destiny

A new day rises for humanity  
Time comes to make way for another life  
Time changes in the law of evolution  
We were satisfied with our old life but  
Some events have changed it  
Now we study process of life evolution  
Through genetic experiencies  
Human destiny is in our hands  
We'll be reborn from our ashes  
NEVERENDING DESTINY
