"The Hero"

Visit "[The Hero](#)" on MotoLyrics.com

A deadly machine invading our planet
Monsters of steel, they are burning
Our world and liberty

Hear our call, hear our cry

The hero has returned
He's back to save our souls
The hero has returned
The evil is over
The hero has returned
With the power of thunder
The hero has returned
And he jumps into the eye of the storm

His laser beam defeating the menace

The hunt now begins: he will fight

A lone warrior against the steel

It's mechanical, biological
It's behind you to kill

The killing is over, the future is clear
The machine is defeated but this war... it never ends

The hero has returned...
