Something about the way you moved that caught my  
eye

I really did have to try it, yes

I can't deny it

The way your body swayed

As I watched you from behind

That got me so excited, mm

How could I fight it?

Baby let me be the one to hold you

To give you all the things I know you miss

You know that we can wait another lifetime

And we can never find a love just like this

(Chorus:)

If You lay down, lay down beside me

You can get on inside me

And I can get on inside you too

If you lay down, lay down beside me

You will wake up beside me forever

Forever and ever

Baby, Let's take this chance to get to know each other  
better

Maybe we will discover

We can be more than lovers

I'll give you what you need

Just come to me and get it

Baby you won't regret it

No, No, No, No baby yeah

Baby move a little close

Yes, I wanna feel your body next to mine

And before this night is over

You will know just what it means

To be loved until you scream

(Chorus:)

If you lay down, day down beside me[uh! ]

You can get on inside me

And I can get on inside you too

If you lay down, lay down beside me

You can wake up beside me forever  
Forever and ever

Tonight we'll find, find just what you been looking for  
Good, good loving and a whole lot more  
So, Hold on, real tight  
Hold me and don't you let go!  
Not til I tell you to, heyyy ooohh

(Chorus:)

If you lay down, day down beside me[uh! ]  
You can get on inside me  
And I can get on inside you too  
If you lay down, lay down beside me  
You can wake up beside me forever  
Forever and ever

If you lay down, day down beside me  
You can get on inside me  
And I can get on inside you too  
[Let me inside your heart]  
If you lay down, lay down beside me  
You can wake up beside me forever  
Forever and ever
