Let's fall in love again
Dive through windows and rescue our friends
How long till this makes sense? Oh, oh

Let's fall in love again
Dive through windows and rescue our friends
How long till this makes sense? Oh

It's coming out loud and it's taking over
Bleeding right out of the summer sky
It's coming out loud and it's taking over
We give it our all so we don't know why we can't

Slow it down
It's way too fast
Slow it down
It's way too fast

We're going on a search in some second hand stores
Got to get back what we all threw away
We're going on a search in the middle of nowhere
We don't know what we're doing but we got to just give
it a go
We got to just give it a go

Let's fall in love again
Dive through windows and rescue our friends
How long till this makes sense? Oh, oh

Let's fall in love again
Dive through windows and rescue our friends
How long till this makes sense? Oh

Let's sing that song again
'Cause it's been messed up for years
Let's make it ours again

Desperate like rainforest trees
Straining towards broken light
All fighting for their lives

Let's sing for Canada

'Cause that's where this song began
Born out of true romance

Oh, it's coming out loud and it's taking over
Bleeding right out of the summer sky
It's coming out loud and it's taking over
We give it our all so we don't know why we can't

Slow it down
It's way too fast
Slow it down
It's way too fast

We're going on a search in some second hand stores
Got to get back what we all threw away
We're going on a search in the middle of nowhere
We don't know what we're doing but we got to just give
it a go

Slow, slow it down
It's way too fast
Slow, slow it down
It's way too fast

Slow, slow it down
It's way too fast
Slow, slow it down
It's way too fast
