You look like the kinda woman girl
That's hot to handle
The type to have me starring in a sexual scandal
I know your type cause you and I speak the same lango
Can I have the honours of gripping your love handles
Your love handles
Your love handles
Can I have the honours of gripping your love handles
Your love handles
Your love handles
Can I have the honours of gripping your love handles
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
Come on
Come on
Come on
Come on
Come on
Come on
Come on
Come on
You look like the kinda woman girl
That's hot to handle
The type to have me starring in a sexual scandal
I know your type cause you and I speak the same lango
Can I have the honours of gripping your love handles
Your love handles
Your love handles
Can I have the honours of gripping your love handles
Your love handles
Your love handles
Can I have the honours of gripping your love handles
While you bend over
While you bend over
While you bend over
While you bend over

While you bend over
While you bend over
While you bend over

While you bend over
Come on
Come on
Come on
Come on
Come on
Come on
Come on
Come on

Shawty you're so damn sexual So damn incredible
And that ain't helping at all
You know I got it shawty
But that ain't stopping you from being naughty
It's like you want me to climb in and fall
Find myself up outta you
What am I supposed to do
When you're... that at me like a big ball
What really...tossin you
But I gotta think about me too
But you have to spread yourself on the wall

While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over

You look like the kinda woman girl
That's hot to handle
The type to have me starring in a sexual scandal
I know your type cause you and I speak the same lango
Can I have the honours of gripping your love handles

While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
While you bend over
Come on
