"Moving Out"

Visit "[Moving Out](#)" on MotoLyrics.com

Moving out to the countryside to see what opportunities
arise

I hope that you can find a place

And maybe I will follow one day

Computer time

And you have what it takes to get your heads down and
be those greats

Henry helped us realise it's worth it when we come out
the other side

We are butterflies working out our lives

In and out of cause

We don't need no camouflage

We are butterflies working out our lives

In and out of cause

We don't need no camouflage

We're moving out to the countryside

To make the most of all that you can find

First turning

Now you've grown so tall

A gallery we'll build us upon a wall

Now we've got this whole place to ourselves

We can take our insides off the shelf

The vocal always sticks in mind

And pushes 'til we come out the other side

We are butterflies working out our lives

In and out of cause

We don't need no camouflage

We are butterflies working out our lives

In and out of cause

We don't need no camouflage
