I'm on fire  
Nothing's gonna hold me back  
Unless the sky has a pocketful of tricks to try

Oh  
You pick a colour and I sing it for you  
I know you feel the same way  
Say  
Say  
Say you feel the same way

Your fingertips are like a superhuman touch  
Can't get enough of this electric love  
Burning the sun with just a wave of your hand

Sparks flying out in every direction  
There's more of this to come  
I think it must be heaven  
Burning the sun with just a wave of your hand

I'm on fire  
Golden echoes upon my face  
Tell those dreamers they can dream up all they like in  
this place

Oh  
You pick a colour and I sing it for you  
I know you feel the same way  
Say  
Say  
Say you feel the same way

Your fingertips are like a superhuman touch  
Can't get enough of this electric love  
Burning the sun with just a wave of your hand

Sparks flying out in every direction  
There's more of this to come  
I think it must be heaven  
Burning the sun with just a wave of your hand

Just one day like this will keep me going on  
Tender kisses will keep me going on  
Oh  
Oh  
Oh

Your fingertips are like a superhuman touch  
Can't get enough of this electric love  
Burning the sun with just a wave of your hand

Sparks flying out in every direction  
There's more of this to come  
I think it must be heaven  
Burning the sun with just a wave of your hand

Seems like hell has broken loose  
It couldn't be more beautiful  
I just want to burn the sun with you

Must be God to inspire the greatest minds in all of  
power  
I just want to burn the sun with you  
With just a wave of your hand
