Sometimes life seems  
Full of complications  
Hard to see the forest  
For the trees  
Just a little brave imagination  
Opens up new possibilities  
So look behind your eyes  
You'll be surprised at what  
You see

Life is full of tricky situations  
Don't get caught up  
In the yesterdays  
There's a something  
Called imagination  
Even little children find a way  
So put your hand in mine  
I bet we'll open up the door  
If we seek we'll find shining  
Star's design  
Get out the lamp and bring  
Our fantasies to light

#### **CHORUS:**

We've got take a spark  
And try to light the dark  
And take this dream to heart  
We can't let it get away  
Imagine you and me  
A dance in ecstasy  
Believe and it shall be  
It's the chance that we  
Should take

There's a man I know south  
Of the border  
Who's seen the world and  
Never left his home  
I heard him talkin' to his  
Only daughter  
He said you don't have to

Fear the great unknown  
Darling in your mind  
You've got the best and  
That ain't all  
If you seek you'll find  
Shinning star's design  
We got the lamp that brings  
Our fantasies to light

CHORUS:

We've got to take...  
... We can't let it get away  
We'll take what's on our minds  
And give it room to shine  
And see what we can find  
There's so much to celebrate  
Imagine you and me...  
... Believe and it shall be  
If we only try imagination

If we seek we'll find a  
Magic star's design  
We've got the chance to  
Bring our fantasies to light

CHORUS:

We've got to take...  
... We can't let it get away  
We'll take what's on our minds  
And let the secret shine  
And see what we can find  
There's so much to celebrate  
Imagine you and me...  
... Believe and it shall be  
Because there's nothing in the way  
We've got to take...
