Hear it now, it's nothing new  
Challenge awaits, it beckons you  
Head above water. Try to survive  
Through crashing waves  
Battle through life  
Bend and suffer for the usurper  
The ones you help will help themselves  
But you keep on climbing further  
Despite the broken higher shelf  
Head above water. Try to survive  
Through crashing waves. Battle through life  
Empty promise, suiting selves - Grasp the air  
Work and save, spend on nil - Grasp the air  
On the outer not inside all alone  
Your closest kindred knock you off your thrown  
Do you ever get the feeling that you battle all alone?  
For things in life that seem important  
Cannot leave the comfort zone
