[Slug]

I'm sparked, waiting for the dark to hit  
Cause once the moon gets above my apartment  
I catch fits for starting shit  
I'm smart with it, I give it that special touch when I push  
it  
Cause I'm also a label rep, and I can't allow no bullshit  
So shush kid, shush baby, shut your eyes  
Lay your head back, shed the fear and let the tears  
crystallize  
I wish the flies to land upon your forehead  
When I extract the essence from your head  
and leave your body resting in Moorehead  
I've left more dead reputations than HIV can  
But for every killing there's a reason and it's not just  
MC's, man!  
I'm watching C-SPAN, waiting for the first state rep  
To take the first step, to have me killed off to make this  
world perfect  
Well lets get shit right, right here, right now, right  
away.  
Atmosphere motherfucker, if I need to I could fly away  
I'll grind you and your weak crew into beef stew  
Serve you with seafood  
You can't cloud my vision 'cause you're see-through

[Spawn]

You need to recognize the size of the Atmos  
You ain't as tall as half this madness past what you  
practice  
Obviously you can't fuck with my tactics, you bastards  
Thats why you breath fast bitch - no need to ask

[Slug]

We dug the fingernails underneath the skin of your  
scalp, then peeled it  
Sent your underdeveloped pre-school style on a field  
trip  
Now bite your tongue, this is how the mic gets done  
A whole tree to pick some fruit from, man,  
You had to choose the ripest one

[Spawn]

That said it all, it comes from inside, and how you ride  
the sound wire when it's live and the vibes feelin' right  
Catchin' the motion given by rhythms when you hit 'em  
on time

with lines, makin' sure your rhyme soundin' tight  
Your voice should travel without the babble of the  
average emcee

so listen please use discretion when you breathe  
sound is vibration, I choose to use it with a vision  
and then comes the style and precision...

[Slug]

No more longer will we hold your hand  
Why? Cause you're too damn old  
Oh yeah, the networks called  
They told me to tell you you've been cancelled  
They also said big up for all the support  
Thanks to your devotion, they now control the world  
So let your hair down and eat the poison with a tall  
glass of Tang  
I'm rising past the bank, with smile I'm flashin' my fangs  
I tumble over some, 'cause some I don't over stand  
I got the clout from Spawn, from now on, I know the  
plan

[Spawn]

It's the noise it makes, that generates the passion I  
have  
It's the void it breaks, that stimulates when mics get  
grabbed  
It takes shape - escapes from these vocal chords I have  
Atmosphere: music makers from the Rhymesayers lab

[Slug]

Come now, whofi gwan test the giants, when we apply  
this  
Vice grips to your eyelids to make you read the fine  
print  
The tyrants that gave you crisis, left you silenced  
Don't breathe a sigh of relief 'till you hear the rescue  
sirens

[Spawn]

Supreme, be this team, we got this shit on lock  
Obviously we hid the key under an upscale rock  
So you could knock all you want to but you ain't gettin'  
in  
You could try to crash the door but you ain't gettin' in  
Nigga, what, my definition is raw, I got you all  
wishin' I'd fall, so things could get better for y'all  
but I'm tall, and got game, remain the same for the

Atmosphere...embellished with talent and the wisdom  
not abuse it

Blessed with insight, friends and influences

Thats what keeps us dope, what makes us dope is the  
surroundings

Inspiration stems from love and stress compounding

Stamina: that is achieved over the course of time

in fact, time taught me how to breath, battle, not to  
court my mind

defined as lyricist - the Atmosphericist

makin sure you fear this shit every time you hear this  
shit

[Spawn] Sound is vibration

[Slug] This sound is taken

[Spawn] Sound is vibration

[Slug] And the ground is shakin'

[Spawn] Vibration is sound

[Slug] Yo, we found your replacement

[Spawn] Vibration is sound

[Slug] Now who makes the sound?

[Slug & Spawn] : And who makes the music/sound?

(\*fades out\*)
