In the mountains of Norway, where the weather is cold,  
there's nothing to do, except kill each other, and play  
guitars in the snow

excluding the scary paper make-up that they wear,  
they resemble ink and dagger, if ink and dagger had  
long hair

they're pretty evil, and they do not like god,  
i don't care if they burn down churches,  
but they'd better not fuckin' touch the synagouge

i befriended them  
bye bye mom, it's now me and my black metal friends  
i befriended them  
bye bye franklin, it's now me and my black metal  
friends

they have names like igor, Helthor, Angor,  
but then again, it's not exactly like "in living color",  
i kinda hope they move here, so i don't have to pay  
import prices,  
but i'm kinda afraid that they'll move near me,  
because, they're not nice

i befriended them  
bye bye mom, it's now me and my black metal friends  
i befriended them  
bye bye franklin, it's now me and my black metal  
friends

come on, ilene,  
come on, ilene,  
come on, ilene,  
come on, ilene!
