Remember this

THIS

It's when we lost all our trust

Some will always bring down the life we try to hold up

Stand determined cause nothings going to improve

The harder you try the more you see yourself be used

Close it now

An open door means an easy way out

This open door is an easy way out

How can this be a justified means to an end

Where our generation is left with nothing but them
selves to defend

Your attention must be fixed this will never settle down

Attention must be fixed this will never settle down

All our interesting points will all lead together

To show how we wanted ourselves to be remembered

The hunter becomes the hunted

The hunter becomes the hunted

Always trying to get where I wanted to be

This is a life-force and I'm never stopping

We must look up to ourselves

AND WE MUST LOOK UP TO OURSELVES

Nothing ever goes my way

Nothing ever goes my way

Nothing ever went my way

Nothing ever went our way

WENT OUR WAY
