People you can't trust (x's 4)
Will always let you down
They will say trust in me, but you see they will always
let you down
They'll cheat you - always 'round - always 'round
That's
People you can't trust
Will always let you down
People'll say that you're their friend, the love all
mankind
But they really only love themselves and this is what'ca
find
First they'll take all of your money and then they'll steal
your wife
They'll take the coat right off your back, they'll even
take your life
People - They'll always do you
People - They're out to screw you
People - Love to abuse you
People - They'll always screw you, They love to do you -
Down
People you can't trust
They'll always let you down
One of these days you'll think you've found a true and
faithful friend
Someone who will really stand by you until the bitter
end
But if your luck gets hard up you friends will put ya
down
You'll reach out for your faithful friend and he won't be
around
(repeat 1st stanza)
