

Algebra "Come Back"

Visit "[Come Back](#)" on MotoLyrics.com

Those days were so comfortable
Never had to worry much
Nights at time would impersonal
Wondering where I was
But my heart would follow anything relatable
I know I let you down
Never related you to pain
Now my need to please is so visible with my life in your
hands
Try me again

Come back don't leave me this way (2X)

Give me one more chance to prove
Why there's no one that comes before you
Oh if you forgive me for what I've done
In the past I would not ask for nothing in return but your
love

Come back don't leave me this way (2X)

I long for you so
That it seems like you never left
Oh my sorrow makes me second guess
How I felt so if you left please comeback

Come back don't leave me this way (2X)
