I've heard your voice, I've felt your touch
But only in dreams have I felt this much
I've not seen your face, I don't know your name
But here in my heart you have a place
I'm not for sure, but i believe
You're out there waiting for me

Chorus:

I'm waiting for you bidding my time
Keeping my heart from crossing over the line
Counting the days until my dream comes true
I'm waiting for u, taking it slow
Until the moment that I can let go

One day I know I'll say I do
I'm waiting for you

I can go on a date and have a good time
But you're always there in the back of my mind
I'll know it's you when you take my hand
And right by your side is where I will stand
I know how good it' gonna be
The moment that you find me

Chorus:

I'm waiting for you, taking it slow
Until the moment that I can let go
One day I know I'll say I do
I'm waiting for you
