it was a long hard road  
it was all up hill  
we nearly lost our way  
we nearly lost our will  
so we clung to the rocks  
where the cold winds blow  
till love gave us strength to finally let go

we climbed that mountain and we got so high  
and on the wings of an angel, we took to the sky  
out here on the edge love dared us to try  
oh baby some people fall, some people fly

many they fall for passions kiss  
and many they say is this all there is?  
well it never was easy  
to rise above  
to look into the eyes of love  
we climbed that mountain and we got so high  
and on the wings of an angel, we took to the sky  
out here on the edge love dares us to try  
oh baby some people fall, some people fly

and baby love has no fear  
leap and a net will appear

we climbed that mountain and we got so high  
and on the wings of an angel, we took to the sky  
out here on the edge love dared us to try  
oh baby some people fall, some people fly

some people fly  
some people fly
