"Process Of Elimination"

Visit "[Process Of Elimination](#)" on MotoLyrics.com

Our forefathers came with a vision and dream, to settle
on this land

They built a great nation with blood and sweat, to
benefit all of man

A path of destruction they did not see, they did not
understand

Live for the moment instead of the future, typical for all
of man

Chorus:

Overpopulation will soon take its toll

The growth of mankind is simply out of control

Soon no where to turn, we run short of precious land

Take our complex problems and place them in our
children's hands

Living on a dream, a final prayer, future lies unseen
Hope to make a difference in our lives, its up to you
and me

Destroying ourselves day by day, can we change at all
Hope for the best and keep on fighting before we take
a fall

Repeat chorus

In the past, wars were benifical, man's its only enemy

Without this devastation we have inequality

People live longer than yeasterday, their offspring on
the rise

It's mordern science, will it be answer or will it be our
demise

Repeat chorus

Solo: Skowron

Repeat third verse

Repeat chorus
