Grey clouds are filling the sky overhead  
It's nothing surprising  
Considering events of play

I don't wanna be part of this formality  
I don't wanna be dragging all humanity down.  
But they don't care, why would they?  
They'll all be miles away

Action without consequence, ignorance  
It's been going round  
Now it's coming back around again.

I don't wanna be part of this formality  
I don't wanna be dragging all humanity down.  
But they don't care, why would they?  
They'll all be miles away  
I don't wanna be part of this formality  
I don't wanna be dragging all humanity down.  
But they don't care, why would they?

I don't wanna be part of this formality  
I don't wanna be dragging all humanity down.  
But they don't care, why would they?  
They'll all be miles away [x4]
