There's something obstructing the way ahead  
Contrary to the signs I read  
Can't help but wonder how I got here  
This journey, my path unclear.

If I could see what you can see in me  
Things would be  
That much easier. [x2]

There's no way of knowing what's round the bend.  
I'll make it with your help, I'll fend.  
I've journeyed far from the beaten track  
You found me and brought me back.

You showed me how,  
Please show me how.

If I could see what you can see in me  
Things would be  
That much easier [x6]
