Another day, lost in this veil of grey,
Fading into night,
It's like I'm blind, it's like I'm paralyzed,
Don't feel like I'm alive

The U appeared through the rain,
Chased all my clouds away
The day I found your love was the day life began.

The first time I smelled a flower, the first time I felt the
breeze,
The first time I saw a rainbow, heard a melody
Could never understand, beauty until I held your hand,
The day I found your love was the day life began.

Never knew why, people liked butterflies,
Or watched the setting sun,
To stare at the sky, seemed like a waste of time,
Until I found the one,

Who opened my eyes made me see?
All the beauty surrounding me,
The day I found your love was the day life began.

The first time I smelled a flower, the first time I felt the
breeze,
The first time I saw a rainbow, heard a melody
Could never understand, beauty till I held your hand,
The day I found your love was the day life began.

Were like a new creation, I'm Adam U be eve,
Don't eat no dirty apples, stay right here with me,
U gave me breath again, like the sunlight gives life 2
plants,
The day I found your love, was the day love began
