So what's coming next and who will follow?

These are days of the carbon clones, emulations, robot zones,
The bar coded, fabricated, artificially inseminated,
Millions breed from just one seed and then it grows
and then it spreads,
The post modern age multiples, subculture dies to plastic rise,
Advertise a new campaign, make the world look the same,
Brand this world and form a race, synthetic race,
human fakes,
Spend our time and spend our minds, but all that bling
doesn't make us shine,
Make us shine.

Don't believe everything they sell you,
Don't you buy everything they tell you

Break the code, human concentration, break the code,
Break the code, human concentration, break the code,
Break the code, radio nation, break the code,
Break the code, human concentration, break the code.

Their walking the walk, talking the talk, talking the words of others,
The brothers who came some years before, some years before, how many more,
Contrived rhymes, in sync, in time, formulated by the media signs,
Follow the lead of the capital greed, target the youth who are deceived,
Simon says be a rapper, a mother fucker,
The message repeats over again in the sequel that never ends,
The story's told so many times, so many times, so many rhymes.

Break the code, human concentration, break the code,
Break the code, human concentration, break the code,
Break the code, radio nation, break the code,

Break the code, human concentration, break the code.

Style prison, consumerism, social trend, fashion
system,
Urban condition, human concentration,
Radiation, radio nation, cloning millions,
Aaaargh shut up, you're like them, you're know
different,
Criticizing just like them but sounding just like them,
You're one of us now, a contradiction,
Remember the rules, remember the code, remember
what you're used too,
Remember the rules, remember the game, no way.

Break the code, human concentration, break the code,
Break the code, radio nation, break the code,
Break the code, human concentration, break the code,
Break the code, human concentration, break the code.

So what's coming next and who will follow?
