Welcome everyone
Wherever you been coming from
This is where we belong
Welcome everyone, to Zion

Close your eyes and listen, don't make a noise
Concentrate and focus on just my voice
Let yourself imagine infinity

One time, step outside your life
Let go of these days
You are a chosen soul
Right now and always

Welcome everyone
Wherever you been coming from
This is where we belong
Welcome everyone, to Zion

Space and time illusions to pacify tiny minds
Perception can pass us by
Open wide, imagine infinity

One time, step outside your life
Let go of these days
You are a chosen soul
Right now and always

Never forget you're loved
Don't forget love
Don't forget you're loved
Don't forget love

Thank you for my life
