I think I'm gonna lay it on the line
I'm wasting time waiting here for you
So I guess that I'll be moving on
All hope is gone
Now there's nothing I can do

So where you gonna go now that it's over?
Now that it's over, I don't know
The nights are long, and the feeling's gone

I don't wanna be waiting here in line
I'll just fall behind
I wish you weren't so far away
I thought that you were one of a kind
'Til you changed your mind
I guess you're more just like the same

So where you gonna go now that it's over?
Now that it's over, I don't know
The nights are long, and the feeling's gone

I just wanna fall in love and have that be enough
And it'll never, ever change
I just wanna fall in love and have that be enough
But with the pleasure comes the pain

So where you gonna go now that it's over?
Now that it's over, I don't know
The nights are long, and the feeling's gone
The feeling's gone

So where you gonna go now that it's over?
Now that it's over, I don't know
The nights are long, and the feeling's gone

So where you gonna go?
Where you gonna go?
