

Allred "Home"

Visit "[Home](#)" on MotoLyrics.com

I've fallen down I can't get up again
I've lost myself, I'm losing everything
I wish I could change the world, I'll find a way

All we ever wanted was a place to call home and not to
feel alone

When the sun went down
We should never change the way that we are
Cause we've come too far to turn back

How could you just walk away from me?
I'm not asking for your sympathy, just love me
I wish I could change the world, I'll find a way
All we ever wanted was a place to call home and to not
feel alone

When the sun went down
We should never change the way that we are
Cause we've come too far to turn back now

And time goes on with or without us
So don't linger on what you can't change

All we ever wanted was a place to call home and to not
feel alone

When the sun went down
We should never change the way that we are
Cause we've come too far to turn back now
