Better watch your step
I'm coming closer
Do what you got to do
Better take a breath
I'm just a friend
And you got some boyfriend too

It's about that time
I'm crossing that line
Between her and me
Who knows where it goes
Guess we'll see

Now the place is set
But it's packed up with people
Prying us both apart
So I steal her back
Pull her into this closet
Close the door and start

I spin her around
Slide to the ground
Get down on my knees
The straps cross her back
In my teeth I pull
And pull

Hips and wet lips say pull me in baby
Pull me in

Now the crowd gets loud
But I can't hear a thing
She's breathing in double time
She hits that sound
Grips the back of my hair
And swears she might lose her mind
My fingertips and friction's applied
Tongue tied-still she screams
Just like when she did
In my dreams
I pull
And then pull

Hips and wet lips say pull me in baby
Pull me in and push push push

Now I'm more than ready
To be alive
Now I'm more than ready
To take her on my vibe
Now I'm more than ready
To give a try
Now I'm more than ready
To take her

Down

And then pull

Hips and wet lips say pull me in baby
Pull me in and push push push

Now I'm more than ready
To be alive
Now I'm more than ready
To take her on my vibe
Now I'm more than ready
To give a try
Now I'm more than ready
To take her

Down
Down
Down
Down
Down
Down
