Riding a beam of light
Light on your love tonight
You touched this child's delight
Mmm, I'm high on your love

Who'd think someone could be
All that you are to me
I can't believe the joy you brought to me
A means to be so free
A means to be so free
A means to be so free

Riding a beam of light
Light on your love tonight
You touched this child's delight
Mmm, I'm high on your love

Who'd think someone could be
All that you are to me
I can't believe the joy you brought to me
A means to be so free
A means to be so free
A means to be so free
A means to be so free
A means to be so free
A means to be so free
A means to be so free
A means to be so free

A means to be so free
A means to be so free
A means to be so free
A means to be so free

A means to be free
A means to be free

A means to be so free
