Colleen (I saw him first)-amanda marshall

Let me tell you about colleen / my best friend since I
was three
She always had a taste for dangerous things / her
scandalous tongue was extreme
I was always the one left holding the bag / smiling and
covering her tracks
Best friends, they always do that / she was the first one
to smoke a cigarette
She once let me watch her make love / it was the kind
of balance made by kings
She took it all, but left me some / I guess I always
thought that she'd have my
Back
But it didn't work out like that / the moment I laid eyes
on jack

Chorus

It was my time it was my space / it was the bright red he
brought to my face
Every underdog has their day / sorry it hurts / but
colleen, I saw him first

It all happened on a thursday / he backed his car right
into mine
"there are no accidents", my mother told me once / my
heart agreed with her
This time
Colleen jumped out of the car, screaming / "what have
you done? !
Jack offered apologies / I just got weak in the knees

Chorus

It was my time it was my space / it was the bright red he
brought to my face
Every underdog has their day / sorry it hurts / but
colleen, I saw him first

The minute that you're in it / you know there's no
turning back

Like me and my jack / a funny thing
To feel the weight of the pendulum swing / when it
starts to swing
Colleen, armed with charm and body / still couldn't
take my man
Last I heard, she was in rehab / I guess that scale got
outta hand
Covered from head to toe in coloured tattoos /
searching for higher views /
Hungry for I love you's

Chorus

It was my time it was my space / it was the bright red he
brought to my face
Every underdog has their day / sorry it hurts / but
colleen, I saw him first

Colleen, I saw him first
