There'll never be another one  
You're going to be my only one  
You bring joy to my life  
You'll always be free  
I will never leave  
When I'm right next to you, I promise to be true  
When I'm right next to you, there's nothing I won't do  
If I'm right, next to you, I'll always love you  
When I'm right next to you  
I thought all hope was gone  
But then you came along  
And all my pain was relieved  
With you I will survive  
You make me feel alive
