(feat. Bootleg Kev)

Feeling the winning is the only option right about now
Is real wine got me pissy though,
Low key

So I'm left no choice, but to get out no real

Red wine remedies, real nigga tendencies,
niggas out here balling room so they getting penuries,
my mama always told me I should pray for my
enemies,
but my niggas they gonna get that kay for my enemies,
who should I listen to when niggas wanna see you lose,
don't wanna beat you, but they ..see you prove,
what's real without fiction, ..Jordan without pimpin,
nigga is pimpin I'm like Magic with this rapping
far from average went from scrapping, until the trap
until the clapping
for this green it, for this ..I will gun it, I will stab it,
niggas can't relate because they never been a savage
you manage your money to me your man frontin
I had the cop teen change, I never had nothing
I just pace and let you stress to get ahead of me,
while me and my dog, see all this pedigree,
Let it breathe, let it breathe.

Hook:

Another day, another blues.. thing, to a star,
things change, what to do with mama was working
daddy wasn't there in the mirror I stare
see daddy right there, get up, if I fall
taking every charge ball, life is off aside
for the lames, but the dreams, for the true
I'm fitting through my memories, red wine remedies.

Red wine remedy with money on the table,
you charge it to the game man, we charge it to the
label,
haha, it's the play I just call it baby,
don't be scared it's just balling baby

and keep your nose out of my wallet baby
the price been causing all this problems we've been
talking crazy
he never care what my enemies do,
I'ma trip, I'ma fall, I'm an injury too
I learned that when people leave they never grab a
rack,
and when they see you in the .. they rather grab a plate,
forgiving people don't make you weak, it don't make
you fake,
and make you strong enough to know that people make
mistakes,
I wish my pops any left, any giving night,
since he did me ..remind me who I'm just like,
I still dead, no matter where the weather gets,
now look me in my eyes, my man, my better..
