Well the paper reads
What the people need
Can't distort the truth to fit your needs
Can you sleep at night
Can you wrong the right
Self-destruction, empty-hearted blues
Now what can I do, yeah

I believe
It's just a matter of time
'Till we fall apart
Fall down on our face
Condemned to life, imprisoned by
One false move another one dies
Now I hate the fucking world

Bullshit politics
For bullshit policies

Can't contort the truth to fit your needs
Can you sleep at night
Can you wrong a right
Self-destruction, empty hearted blues
Now what can I do, yeah

I believe
It's just a matter of time
'Till we fall apart
Fall down on our face
Condemned to life, imprisoned by
One false move another one dies
Now I hate the fucking world

(Repeat)
I hate the world, I hate the world
I hate the world and I hate you too
