You better calm down
I'm not liking the sound of your voice
I might blow up on you I can't say
I've been drunk since noon
Kaboom!
Now the boys won't take me out in public
They wanna drop me like an awkward subject
Let me be clear I've a mean streak my dear
Everyone that I meet I wanna stab in the ear

Except you 'cause you're like me
We both act miserably
I like you 'cause you're like me
We both act miserably
It must make us happy

Fuck all these people
I can't stand the looks on their face
Just one more nasty glance
And I might just fuck up the place
A disgrace
Thought I was just a basket case
It's looking more like a kick to the face
Let me be clear I've a mean streak my dear
Everyone that I meet I wanna punch in the ear

Except you 'cause you're like me
We both act miserably
I like you 'cause you're like me
We both act miserably
It must make us happy
Kill 'em all
