I'll say goodbye
And then we'll kiss
I'll hold you tight
Remember this
Could be the last time
That we see each other (x2)

You'll close your door
And close your eyes
I'll call you up
And say goodnight
You say I love
I say I'll love you forever

I swear I will

Don't let this fall apart
Because when it does
All you end up with
Is a broken heart
What's happening to you
Just wait until I'm gone then
And you have nothing to hold on to

You've been upset
I feel it too
But I love
Everything you do
And I just don't think
That can live without this

I won't forget
A word you said
That night
When everything went bad
But I'm not going anywhere
And that's a promise

I need you

Don't let this fall apart
Because when it does

All you end up with
Is a broken heart
What's happening to you
Just wait until I'm gone then
And you have nothing to hold on to

You've got, me I'm
There for you
Your all, I need
I'll be there for you

You'll close your door
And close your eyes
I'll call you up
And say goodnight
You say I love
I say I'll love you forever

You're all I need I'll be there for you

Don't let this fall apart
Because when it does
All you end up with
Is a broken heart
What's happening to you
Just wait until I'm gone then
And you have nothing to hold on to

You've got, me I'm
There for you
Your all, I need
I'll be there for you

You'll close your door
And close your eyes
I'll call you up
And say goodnight
You say I love
I say I'll love you forever
