I am talking to my belly all it says is: eat the animal  
Some fruits won't likely satisfy the pains I'm going  
through

Restraint is a word that sounds too absurd  
Those hippies have no clue

The tiger on the table just said to me:  
In Russia food eats you

And when I start to think about  
These funny life-forms created just for me  
I will never get enough  
To eradicate, we are made

To eradicate, we are made  
To eradicate, we are made

I'm looking at the plate in front of me, I opt for gorilla's  
balls  
It helps to get me appetite for sharks' eyes ragout

Ambrosia is a word I never ever heard  
I simply have no clue

The raptor on the table just said to me  
Make fast our I'll eat you

And when I start to think about  
These fine meals created just for me  
I will never get enough  
To eradicate, we are made

To eradicate, we are made  
To eradicate, we are made

Our voracity... eats the enemy
