Fuck!  
Somebody knows where I live  
Since when has it been in a hide?  
To live in fear is to lure out menace  
And I rather earn the lesson to learn

Some things found and collected  
Swallows the shattered grin of yours

Limbless provocative struggling ever active  
Empty sockets still filled with visions  
Limbless provocative skinned and sold for dog meat  
A longer reach enticing, truly a break

I swear, now I'm paralyzed  
And this is when we start to amputate

Never even close to blind  
Never to face the grind  
Leave your dead behind

Breathing from the vein

This  
Isn't it wrong for you?  
Swallow the shattered grin to keep it for good  
I'd leave your dead behind
