Running out of solutions  
Conscious or carried away?  
Classify, separate, codify - hear dismay  
Atomize, aggregate, rearrange - fear the fate

Invasion and spiritual penetration

Awaken on the edge of unjustified suspicion  
Is the alteration possible with no demolition?  
Deadbeat and shivering, approaching the next period  
The delusion that liberation is drawing near

Mind-set euthanasia  
Arise out of impulse

Mental suicide  
Exertion beyond intensity

With open arms adopting the true desperation  
Affected system towards the new adoring face  
Another victim of a synthetic evocation  
A cry of relief sealing the disgrace
