The fury five / dead not alive
Cryogenic speak
Electroshock / the slaughtered flock
Now watch us hit our peak
One last goodbye / with snipers eyes
A winning murder smile
So neatly bound & gagged
Diced / cut up & bagged
Electron burning trial

We're the guilty ones
Take command / all systems go
We're the hand of god
Nuclear angels watch us glow
The radiation kings
Our reign is closer than you know
The one true clean machine
Pull the plug / all systems go

So state the case / no interface
To cover for your loss
So reconcile with suicide
In glittery shiny gloss
Resistance whore /
Bitch you ain't that pure
That virus looks pretty neat
A prison for the board
Static overload
The one killer elite
