No place on the other side
Cause it is gone
Everything is over
Nothing can be done

You cry in endless grief
You die in endless pain
Nothingness now you believe
Nothing will be there again

This is the last time
That we're here
Death will engulf us
The end is near
No place on the other side
Cause it is gone
Everything is over
Nothing can be done
You cry in endless grief
You die in endless pain
Nothingness now you believe
Nothing will be there again
