Why did you touch me? Your hand wrapped me warmly
Why did you look at me? I can not forget the day wick
met you

A quiet white place No one knows space Only you and I
paint our heaven

We are traveling Nobody understands in a destination
It began from the day Our promise nobody can erase it
It is warmly lighted even when dark cold Cloud is
drifting in the blue sky

I feel air in the whole body I want to draw recolection
with you on the diary of life

Walking in the air... Where is loving place?

I beileve always forever You beileve always forever
You are the one Find our marry stage... only you and I
Fly away from cold, silence emptyness From white
space nothing place

Cloud is drifting in the blue sky

I feel air in the whole body I want to draw recolection
with you on the diary of life

Walking in the air... Where is loving place?

I believe always forever You believe always forever
You are the one Find our marry stage... only you and I
Fly away from cold, silence emptyness From white
space nothing place
