When I was born I had no worries about anything
Now I'm older and my troubles are dropping in
But it's not over
I finished school in 15 years now I'm a graduate
I couldn't stand it any longer I tried to escape
Cause it's not over

But that won't bother me anyway
I can deal with my mistakes

My fortunes may say
I waste it away
But I won't give up on such an ordinary day

I fell in love with the greatest girl
I have ever met
After one year the girl is gone with a guy named brad
But it's not over
No it's not all over yet
All of my days are quite the same at university
Even the women in my life mean nothing to me
I'm feeling like loser number one
Without knowing what goes on

To me life's about to unfold
But all that glitters isn't gold
