The last decision
Just couldn't fail
In an icebox prison
Too blue to set the sails
From out of nowhere
They came around
Then what do you care
If i'm above or beneath the ground

It just can't stay the same
Blow it all away
Just can't take more for less
When you're always dying

Nightmare nirvana
Before my eyes
Silicon karma
The implants make us high
Chromatic virus
Deep in our hearts
Now who cries for us
When the whole thing falls apart
