Tell me  
Who is next  
To get that  
Glory fast  
We are born  
Once to die  
With no given  
Chance to try

I see through  
Beheaded faith  
The other side  
Times without hate  
New children  
Kill the fears  
Sorrow mother  
Deliver no tears

Sister love clear our name  
Make us feel that this dreams are real  
Like blue wide sea-like what we wanna be?  
Sister love dreams for you and me

\* For the rest on "Never Again"  
[Once again she pulled me under  
Under her magic under her spell  
She wants to make my life more harder  
She wants to turn my life in hell]
