Once I thought just like you
That someday it was bound to happen
The total, everlasting love
That the right one would step forward someday
But I know better now
I've learned what life has to offer
And it has nothing to do with love
On the contrary...
Faithful - You don't impress me - Me
We dream of what we lost - Lost
Your smile takes every breath
Outraegous - Yeah, you've got it all...
Get this: Love is imagination
Get this: Passion is just a fake
And you're no exception
Sensuality - A story that amuse me - Me
The thrill to play along
Forgotten in confusion
Back - I know what I want
Get this: Love is imagination
Get this: Passion is just a fake
And you're no exception
Get this: Love is imagination
Get this: Passion is just a fake
And you're no exception
