Were you talkin' 'bout places  
Were you talkin' 'bout that star  
I don't need you to waste this  
Will I be here someday in your heart

Your love doesn't work with me

And now is the day you've always been here  
And you never wanted to hear your fear  
Everytime I know what I've just said  
I will just come for you to pretend

Am I right here to stay with you  
I'm just myself so be the one  
She was loving you selfless too  
Who will be the one whom you will choose

Your love doesn't work with me

And now is the day you've always been here  
And you never wanted to hear your fear  
Everytime I know what I've just said  
I will just come for you to pretend

Someday I will be the one for you  
The day of choosing will just come  
Isn't it now that you'll be true  
And I will know I'm only the sum

Now.....

And now is the day you've always been here  
And you never wanted to hear your fear  
Everytime I know what I've just said  
I will just come for you to pretend
