Now that you're here with me.
Sweetie, don't leave me.
Baby, I need you.
Baby, I need you.

Breathing out the air I just sucked in.
Having you here with me.
Is getting better and better every time.

All I need is you next to me.
Right here next to me.
Sweetie, I need you more than anything

Breathing in the air I just sucked in.
Having you here with me.
Is getting better and better every time.

Boy, I need you more than anything.
Sitting next to me.
Baby, I need you.
Baby, I did you.

Breathing in the air I just sucked in.
Having you here with me.
Is getting better and better every time.
