The history of Man has entered a new stage  
The zenith of all the wars you ever waged  
You incited the biggest mass-extinction  
Known to us since the end of the Permian Age

I know your capabilities - it's worst I've seen  
Now all that ever was - Will no longer be  
One death is a tragedy - A billion a statistic  
I'm glad you were not meant to be - when I'm being realistic

Nobody cares if you die

We all have witnessed your decline  
You made us all part of your biggest crime  
In evolution this offence will be known  
As the Cenozoic Genocide

You pay the price of progress - it should've been  
foreseen  
All that ever could - can no longer be  
Survivors die of cancer - deformed baby's die at birth  
Microbes and single-cells will inherit our barren earth

Isotopes drift further with every gust  
Contaminated clouds spread radioactive dust  
Gamma rays beaming through the stratosphere  
Now meet your maker, your deliverance - is here!

God doesn't care if you die  
He will rejoice - And so will I

It's what you wanted - and so it shall be done  
Despite the omens - you have never grown beyond  
A flaw in evolution - Now cherish your demise  
On behalf of all humanity  
I apologize
