Jack: Three months have passed without a word  
No authorities believe what I've been through  
I've been browsing the web for that sign  
I don't know what to do

Storyteller: But like everyday he went online  
This time surprised of what he'd find  
An article involving a scientist  
Revealing a photo with the sign on his wrist

Jack: That sign!

It says this DNA expert Ruben is missing  
And so is his wife Nancy  
The US government are desperate to find them  
At any cost

Storyteller: Jack gets on a plane to Nevada  
Where Ruben and Nancy used to live

Jack: I need to know what that sign stands for  
I can't just sit around anymore

He receives an e-mail on the plane  
With info from Fredrik Ben  
"Rumour has it that in the States  
They have found alien DNA  
A source of mine confirms a symbiosis  
Between the US and the swedish military  
He wouldn't say what it's all about  
Since it is highly classified"

Jack:  
Tells more than the media want us to know  
In Mexico women are currancy  
In the hands of the criminal society  
Which deliver human eggs  
For genetic research technology  
To a US corporation called "The new dawn"  
Who knows what's created in their factories?
