"Way To The Stars"

Visit "[Way To The Stars](#)" on MotoLyrics.com

i can see by your eyes you been crying a very long time
and the shadow it casts on your face untill they fade
away
and i know that you long for the day you can walk with
the sunshine
coz your tired and your sick of dealing with this day
today

[Hook]

and when the moon comes to play
and the stars settle in
and your down on a day you just couldnt win
and your up against your will
coz your will powers gone
dont worry babe it wont take too long.. too long

[Chorus]

so on your way to the stars would you please mention
my name
so i feel where you are as i stare at this picture frame
and on your way to the stars would you please mention
my name
so i can hear
the echo of your voice in the rain

[Way To The Stars Lyrics On]

now the clocks there ticking and i dont know where you
gone
all i know is that it aint close to here coz you been too
long
and the tears wanna fall but im already all cried out
and you may think to call but i seriously have my own
doubts

[Hook]

and when the moon comes to play
and the stars settle in
and your down on a day you just couldnt win
and your up against your will
coz your will powers gone
dont worry babe it wont take too long.. too long

[Chorus]

so on your way to the stars would you please mention
my name
so i feel where you are as i stare at this picture frame
and on your way to the stars would you please mention
my name
so i can hear
the echo of your voice in the rain

so on your way to the stars would you please mention
my name
so i feel where you are as i stare at this old picture
frame
so on your way to the stars would you please mention
my name
so i can hear
the echo of your voice in the rain
so i can hear..
the echo of your voice in the rain

now i can see by your face youve been crying a very
long time
