"Back From Nowhere"

Visit "[Back From Nowhere](#)" on MotoLyrics.com

Old spirits have met again
The presage brings the whole will
For winning
Happiness and violence
Side by side
Terrible battles
Another city to destroy

A mission to be done
Now glorification
A long way to run
For another new hurt battle

Reunion, terror flash-back
A lot of critical mass
Waiting for massacre

We're here for "fasttrash"

Back from nowhere
We have never gone out there

Screams and tension
And desire to win
General violence
Helping spirits around

Never think in the end
Think twice when you say
Your mind commands your soul
Don't let your body feel it's alone
