Shower her with darling tips
shawty went and bought a whip
guarantee the city will remember your whole name
you got here with scholarship
all of them ain't all equipped
and this saddens me, I see the pack in order
quote on quote bad bitches work the whole floor
those that get laughed at, sit off in a corner

Like a lab rat, nobody want her
niggas that are married don't wanna go home
but we look up to them
they wish they were us, they want some new trim
we lust for some trust
now the both of us are colorblind cause the other side
looks greener
which leaves your turf in a bosie state
can't see a play or the team

Cause everybody has an addiction,
mines happens to be you
and those who say they don't,
souls will later on say to them "that ain't true"
all of them will have an opinion
but yall know what yall can do with them
but if you're unsure, i'll take your own tour
to a place you can stick that in

Well, sitting here sad as hell
listening to Adele, I feel you baby
someone like you more like someone unlike you
or something that's familiar, maybe
and I can tell that she wants a baby
and I can yell girl that "You're crazy"
all what the hell, nope can't be lazy
please be careful, bitches got the rabies.
