You came awake and you were shaking, lying safe  
inside my arms  
In a cradle of a dream, just before my sleep was done  
And I will keep the words you whispered there forever  
I know someone got you first, I guess I should know  
better, but  
I'm pulled out of my bed by the ringing telephone  
It's my brother on the line, he says wake your lazy  
bones  
The peninsula is shining in the west  
You should run into this day, forget about the rest

And if there's reconcilliation to be found  
And if I'm searching for a reason to be proud  
I will find it, I will find it, I will find it

I will make you a promise and stand firm behind it

They say beautiful dies faster than the things we  
always see  
Everyone's afraid of dying, everybody except me  
That peninsula will shine that way forever  
I will wait for you, my love, we will shine that way  
together

Cause if there's reconcilliation to be found  
And if I'm searching for a reason to be proud  
I will find it, I will find it, I will find it  
I will make you a promise and stand firm behind it X2  
Make you a promise and stand firm behind it
